Experience

Bhrigu Tech

Remote

SENIOR SOFTWARE ENGINEER

May 2026 - Current

- Working as a Senior Software Engineer on different product services to make them decoupled and scale-able in microservice architecture.
- Mainly managing Custom Audit Report Creation and Generation with AI assisted template and SQL generations. It creates a harness in client app connected to langchain intelligence service which helps author create a custom reporting template by getting info regarding table, API Spec, Entity and branding related info in a multi-tenant system securely.
- Working on Auto-Validation module which focuses on Human written Test Protocol files to full Browser automation with Evidence generation and linking to any Document management System. It works on predictable Test Suite runner to validate large distributed systems with natural language guidance, required for any Regulated Industry Software.

Sath Inc.

Remote
